EDUCATION

Concordia College

Moorhead, MN

Bachelor of Arts in Computer Science

Spring 2024

Relevant Coursework: Data Structures and Algorithms, Web Development, Mobile Application Development, Operating Systems, Database Management, Principles of Programming Languages, Computer Networks, and Principles of Software Engineering

Organization and Activities: Project Manager for Computer Science Society, ColorStack

WORK EXPERIENCE

Eide Bailly LLP

Fargo, ND

Application Developer Intern (Full Stack Development)

January 2024 – August 2024

- Developed a full-stack internal hardware lifecycle and fulfillment application that automated and streamlined employee hardware selection and IT fulfillment workflows using **Angular, TypeScript, Kendo UI, C#/.NET, REST APIs, JWT, and MSSQL**, improving process efficiency by **40%** and significantly enhancing IT team operations.
- Modernized legacy applications by migrating codebases from **.NET 4** and **.NET 6** to **.NET 8**, updating application components and dependencies to align with the newer framework and improving application performance by **25%**.
- Supported application delivery from development through deployment using **Git** and **GitHub** for collaborative development, **CI/CD** pipelines for automated releases, and **Microsoft Azure** for cloud deployment, improving the efficiency and reliability of release workflows.

Doosan Digital Innovation America, LLC

West Fargo, ND

Application Developer Co-op

May 2023 – Dec 2023

- Developed and enhanced production reporting applications using **Angular, TypeScript, C#/.NET**, and **Oracle SQL**, delivering real-time reporting, data retrieval, access-control functionality, and application performance improvements with **GitHub Copilot** for AI-assisted development.
- Developed and enhanced factory production workflows in **DELMIA Apriso**, writing **Oracle SQL queries, stored procedures, and functions** to implement business logic, manipulate manufacturing data, and support production operations.
- Served as **Deployment Manager across 7 factory sites**, managing releases of Apriso workflows, Oracle SQL changes, and full-stack reporting applications from pre-production to production while maintaining deployment consistency across all sites.

PERSONAL PROJECTS

Pokedex Web Application ([GitHub Frontend](#)) ([GitHub Backend](#))

Jan 2024 – Apr 2024

- Developed a full-stack Pokedex web application using **Next.js (React), JavaScript, and Material UI** for the frontend, **Java Spring Boot** and **Spring MVC** for RESTful backend services, and **PostgreSQL** for relational data management, with **Docker** for containerization.
- Integrated **Firebase Authentication** with Google Sign-In and developed persistent user functionality for capturing Pokémon, alongside pagination, name-based search, sorting, and filtering features.
- Designed and populated **PostgreSQL** data models for Pokémon, types, abilities, and related attributes, preprocessing CSV datasets with **R** to support efficient application data storage and retrieval.

Brook's Financial Observatory ([GitHub](#)) ([Website](#))

Aug 2026 – Sep 2026

- Developed a financial analytics dashboard using **Next.js, React, JavaScript, and CSS**, featuring company search, annual and quarterly statements, interactive charts, financial filters, and CSV exports.
- Built **REST API endpoints** integrating Financial Modeling Prep with input validation, server-side API key handling, caching, and error handling; deployed on **Vercel** with eight automated tests covering financial calculations, search, and data processing.

Computer Science Society Club Website ([GitHub](#)) ([Website](#))

Aug 2023 – Sep 2023

- Developed a dynamic website employing **Node.js, Next.js (React), TypeScript, HTML, CSS, and Chakra UI** with user-friendly navigation leading to increased engagement, and participation among club members and more new members.
- Used **EmailJS** to enhance contact form submissions on the website, automate email responses and create enhanced user communication resulting in improved user experience.

TECHNICAL SKILLS

Programming Languages: Java, C#, Kotlin, JavaScript, TypeScript, C++, C, R and Python

Frameworks: React, Angular, .NET, Spring Boot, Chakra UI, Kendo UI and Material UI

Databases: PostgreSQL, Oracle SQL, SQL Server

AI Development Tools: GitHub Copilot, ChatGPT

Developer Tools: Visual Studio Code, Visual Studio, IntelliJ, Apriso MES, Android Studio, Supabase, Docker, Kubernetes, Node.js, Microsoft Azure and Kafka

Version Control and CI/CD: Jira, GitHub, SourceTree, GitLab CI/CD, Confluence, ServiceNow, Azure DevOps
